FOR IMMEDIATE RELEASE

PURSUIT VASCULAR NAMES DOUG KILLION AS NEW CEO

June 17, 2011 - Minnetonka, MN -- PURSUIT VASCULAR INC. a medical device company focused on innovative catheter infection reduction technologies, today announced the addition of Doug Killion as its new President and Chief Executive Officer.

Killion brings over 21 years of medical device industry experience as an entrepreneur, inventor and executive for both large organizations and small development-stage companies. He was formerly the President of Sealing Solutions Inc., where he led the company from inception to successful acquisition in 2010. Before joining Sealing Solutions in 2008, Killion held a variety of senior management positions at Boston Scientific; including director of global marketing, business development, and project management. During his 13-year tenure, he was involved in four entrepreneurial ventures within the company. Prior to Boston Scientific, Killion held various medical device engineering and project management positions at SciMed Life Systems.

Killion has an MBA in Strategy and Marketing from the University of Minnesota Carlson School of Management, and a BS in Mechanical/Biomedical Engineering from the University of Minnesota Institute of Technology.

"I am excited to join Pursuit Vascular as the company transitions to the next level," said Killion. "The Company's R&D and engineering strength have created a solid foundation as we move forward with regulatory submissions, clinical trials and commercialization of our technology," he said.

Killion succeeds founding CEO Bob Ziebol, who has been named Chief Technology Officer. "I am excited that Doug has joined us; he has the right skill set and experience to ensure our success as we enter the next stage of the company's development." said Ziebol. "In addition, this transition will allow me to focus my efforts in areas where I can bring tremendous value to Pursuit Vascular, such as bringing the ClearGuard HD to market, securing additional patent protection, and following on with additional products and opportunities based on the ClearGuard technology."
